ESI Signs Agreement with K 100

Environmental Solutions, Inc. announced today that it has signed an agreement with Youngstown, New York-based Kinetic Laboratories to be a distributor of K 100-G and K 100-D fuel treatment products for diesel and gas operated vehicles, machinery, and equipment.

K 100-D and K 100-G are fuel treatments made up of complex organic compounds that bonds to any water present in a tank, creating, in effect, "burnable" water. The elimination of water then allows an engine to run cleaner and better, improving performance and increasing MPG.

The addition of the Kinetic Laboratories K 100-D and K 100-G product lines compliments Environmental Solutions, Inc. already established lines of green products such as PaveMend, a high-strength, rapid-set repair material for concrete, James River Blends, an organic compost soil amendment, and SoilTac, a dust control agent. "We are excited about the addition of the K 100 lines to complement our existing line of green products. We see the K 100 products being successfully positioned in many of the same areas we currently place our other products giving us one more successful solution to solving a myriad of customer needs," said Jim Gorey, Director of Marketing and Business Development.

Through this exclusive agreement, Environmental Solutions, Inc. will be responsible for the industrial and organizational market development, sales, and customer training for Virginia, West Virginia, Michigan, and Pennsylvania, as well as military applications US-wide.

About ESI: Since 1990, Environmental Solutions, Inc. (ESI) has dedicated itself to providing environmental solutions integrating innovative processes, state of the art technology, and economics. ESI offers training and consulting, as well as, project development and management, using the Environmental Management Systems (EMS) principals. In addition, the company markets green products created as a result of projects managed by ESI. Environmental Solutions, Inc. is a closely-held, woman-owned business headquartered in Richmond, Virginia. ESI's President, Brenda Robinson, has more than 15 years of experience in a Fortune 500 company and more than fifteen years experience with technology-based businesses and co-founded ESI with her late husband, W. W. "Phil" Robinson. ESI's solutions are applicable, successful, and repeatable, working within your unique organizational requirements. For additional information on how ESI can assist your organization in turning waste (by-products) from a liability into an opportunity, visit us online at www.envirsol.com or call 804.740.5605.
